SUMMARY

Software Developer with 6+ years of experience across Backend, Frontend and Conversational AI (chatbot, voicebot, IVR) systems. Currently focused on AI engineering: integrating large language models, building agentic AI workflows with tool use and MCP, and shipping intelligent products end-to-end. Proven leader and collaborative team player as a Scrum Master in agile environments; also building cross-platform mobile games.

EXPERIENCE

VODAFONE Software Developer / Scrum Master

Oct 2019 – Present

- Own FE & BE development and continuous improvement of the LLM-powered Vodafone Chatbot & Voicebot (multi-award-winning digital assistant serving 25+ million customers) and IVR systems.
- Rebuilt the legacy IVR from the ground up as a modern voice platform and lead the voice assistant channel using TTS, STT and Speech Recognition.
- Delivered customer services, gamification and proactive & predictive chatbot projects with Java, Spring Boot, Kafka, Hazelcast, React and Next.js.
- Spearheaded the front-end transformation from React to Next.js, improving performance, scalability and SEO.
- Built real-time conversation monitoring & analytics: live dashboards, alerting and funnel analysis.
- Served as Scrum Master, upholding Scrum principles, values and practices across the team.

CARD GAME Game Developer / Founder

2025 – Present

- Cross-platform mobile card game built with React Native: custom game-logic engine and fluid card animations.
- Completed the full store release pipeline; currently in App Store & Google Play review.

QUIZ GAME Game Developer / Founder

Sept 2024 – Present

- AI-based mobile quiz game with LLM-generated questions and adaptive difficulty, built with React Native and Spring Boot for iOS & Android.

KOÇ SİSTEM Software Developer Intern

June 2018 – Aug 2018

- Designed an internal automation website's frontend using JavaScript, Bootstrap, CSS and HTML.

ACHIEVEMENTS

- Received 9.8/10 from my team in Scrum Master Evaluation (09/2023)
- "The Best Chatbot Technology Award" of Martech with "Technical Support to Fixed Customers Project" as a team (02/2023)
- "The Best Self-Service Technology Award" of Contact Center World with "Technical Support Project" as a team (06/2023)
- Ranked 1st in faculty of Computer Engineering at the university (2019)

SKILLS

AI & LLM Engineering

LLM Integration (Claude, GPT) • Prompt Engineering • RAG • Embeddings & Vector DBs

Agentic AI

AI Agents • MCP • LangChain / LangGraph • Tool Use / Function Calling

Conversational AI

Chatbot & Voicebot • IVR • NLU • STT / TTS / SR

Backend

Java • Spring Boot • Kafka • Hazelcast • REST APIs

Frontend & Mobile

React • Next.js • TypeScript • HTML / CSS / JS • React Native

Tools & Methods

Git & CI/CD • Agile / Scrum • Jira • Unity • Project Management

EDUCATION

Beykent University, Istanbul

Computer Engineering — Full Scholarship (50% Uni. Exam + 50% Performance)

2014 – 2018

Tevfik İleri Anatolian High School, Rize

2010 – 2014

TEOL İstanbul — Language Academy

2014

LANGUAGES

Turkish (Native) • English (Written & spoken fluency)

COURSES & CERTIFICATES

Unity 2D/3D Game Development — 155h (ongoing)

Unity Hyper Casual Mobile Game — 7h (08/2024)

Android Mobile App Development — 75h (05/2022)
